

Buzzer ✨

About :

A buzzer module is added to Pluto drone to add audio producing ability to it.

Add-On used :

A Buzzer module can be used as an indicator or just a beeping signal device. It is a simple Buzzer attached to Pluto drone.

Components and Connection:

Pluto drone, Buzzer module and connecting wires.

Connect the Buzzer_module on the RC port of Primus V5/X2 board

Primus V5/X2 pin	Peripherals
GND on RC port	GND on Buzzer_module
Signal on RC port	VCC on Buzzer_module

How does it work?

In this project we add a utilise a timer to add delay in between the buzzes..

PlutoBlocks

Select Receiver Mode Rx_ESP ▾

on start

- set Timer1 ▾
- time (ms) 1000
- repeat true ▾
- Set Pin GPIO_1 ▾ to LOW ▾

pluto loop

- if check Timer1 ▾
- do Set Pin GPIO_1 ▾ to HIGH ▾
- else Set Pin GPIO_1 ▾ to LOW ▾
- LoopTime (ms) 100

on stop

- reset Timer1 ▾

Working:

Initially, we set Reciever mode as ESP and set timer of 1 seconds
When loop starts, the timer flag turns on whenever specified amount of time is passed, and we turn on and off the buzzer.
Creating buzzing sound.
