

Buzzer ✨

About :

A buzzer module is added to Pluto drone to add audio producing ability to it.

Add-On used :

A Buzzer module can be used as an indicator or just a beeping signal device. It is a simple Buzzer attached to Pluto drone.

Components and Connection:

Pluto drone, Buzzer module and connecting wires.

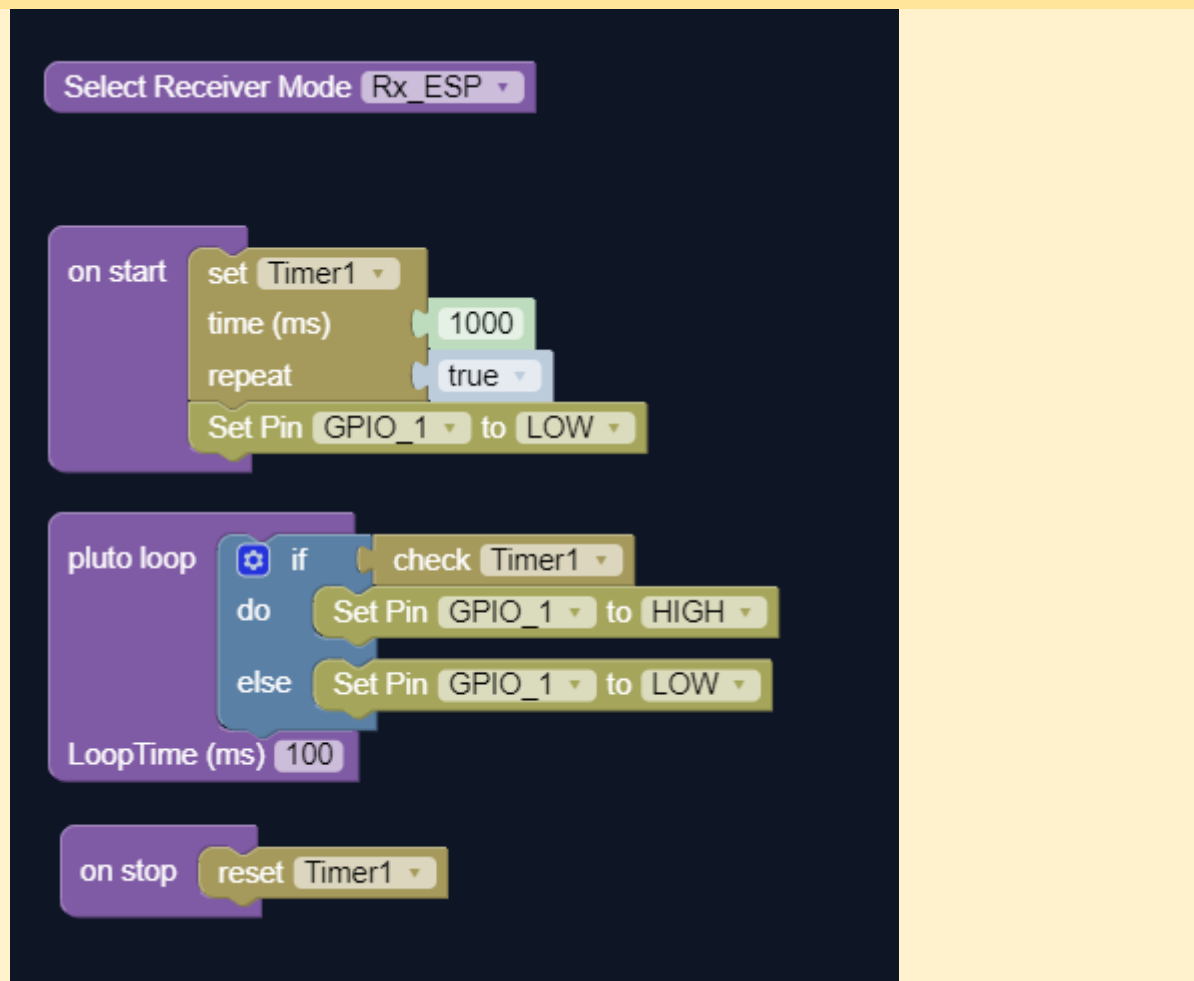

Connect the Buzzer_module on the RC port of Primus V5/X2 board

Primus V5/X2 pin	Peripherals
GND on RC port	GND on Buzzer_module
Signal on RC port	VCC on Buzzer_module

How does it work?

In this project we add a utilise a timer to add delay in between the buzzes..

PlutoBlocks

Working:

Initially, we set Receiver mode as ESP and set timer of 1 seconds. When loop starts, the timer flag turns on whenever specified amount of time is passed, and we turn on and off the buzzer. Creating buzzing sound.
